Information for Contributors

Brain and Language publishes original research articles, case histories, critical reviews, and scholarly notes; each contribution will be concerned with human language or communication (speech, hearing, reading, writing, or non-verbal modalities) related to any aspect of the brain or brain function. Each will have theoretical import, either formulating new hypotheses, or supporting or refuting new or previously established ones. The interdisciplinary focus includes the fields of neurology, linguistics, neurophysiology, psychology, neuroanatomy, psychiatry, neurosurgery, and speech pathology. Manuscripts of several different types are solicited: regular articles, single or multiple case history studies, critical reviews of books of interest to the journal's readership, and short (limited to under 10 pages typed) scholarly notes and comments discussing issues of topical interest.

Submission of Manuscripts. Manuscripts should be submitted to:

Brain and Language
Editorial Office
Seventh Floor
1250 Sixth Avenue
San Diego, California 92101

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be nor is presently submitted elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Brain and Language* represent the opinions of the author(s) and should not be construed to reflect opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Form of Manuscript. Authors should submit manuscripts in *quadruplicate* (one original and three copies), typewritten, double-spaced on one side of 8½ × 11-in. white paper. The original and two copies of all artwork, tabular material, photographs, etc., must also be included. All pages should be numbered consecutively.

Page 1 should contain the article title, author(s) name(s) and affiliation(s), abbreviated form of the title for the running page heading (not to exceed 35 characters including letters and spaces), and the complete mailing address of the author to whom all correspondence should be sent. *Page 2* should contain a short *abstract* of approximately 100 words.

Papers must be written in English. Language data may be given in English when clearly identifiable, otherwise it should be transcribed into the phonetic alphabet of the International Phonetic Association (IPA).

Figures should be numbered in order of appearance (with Arabic numerals) and should have short descriptive captions (typed double-spaced on a separate page). Line drawings must be originals in black India ink on white paper, on polyester drafting film, or comparable glossy black and white photographs. Lettering should be uniform, professionally done, and large enough to be fully legible after a 50–60% reduction in printing. Illustrations in color can be accepted only if the authors defray the cost.

Tables should be numbered in order of appearance (with Arabic numerals); they should be typed double-spaced on a separate page. Each table should have a short descriptive title typed (double-spaced) above the table. Footnotes to tables (indicated by superscript lowercase letters,"[a,b]", etc.) should be typed (double-spaced) at the end of the table. Keep in mind the dimensions of the journal when planning the number of columns in a table.

Footnotes to the text should be kept to a minimum; when necessary, they should be indicated by superscript Arabic numerals,[1,2], etc., cited consecutively throughout the article, starting with the title. They should be typed double-spaced on a separate page.

References should be cited in the text by surname of the author and the publication date in parentheses, e.g., Goldstein (1980) or (Russell & Espir, 1981). If more than one paper was published by the same author in a given year, the correct style is Broca (1982a) or (Broca, 1982b).

References should be listed alphabetically, typed double-spaced at the end of the article. All references cited in the text must be listed at the end of the paper. Journal titles should be written out in full, not abbreviated. Note the following examples.

Fromkin, V. 1980. *Errors in linguistic performance*. New York: Academic Press.

Efron, R., Snyder, E., Yund, E. W., & Martin, F. 1983. Central auditory processing. VI. Detecting ear dominance by evoked potentials. *Brain and Language*, **20**, 54–64.

Bryden, M. P. 1978. Strategy effects in the assessment of hemispheric asymmetry. In G. Underwood (Ed.), *Strategies of information processing*. New York/London: Academic Press.

(Use underlining for journal and book titles only.)

Proofs. Proofs will be sent to the designated author, with a reprint order form. Authors will be charged for alterations in excess of 10% of the cost of composition.

Reprints. Fifty (50) reprints without covers will be provided free of charge for articles. Additional reprints may be purchased; an order form will be included with proofs.

Missing the Meaning?

A Cognitive Neuropsychological Study of Processing of Words by an Aphasic Patient

David Howard and Sue Franklin

Built around a detailed analysis of an aphasic patient, MK, who exhibits a set of bizarre and fascinating symptomcomplexes that make him "four patients in one," *Missing the Meaning?* is an extended case study rich in contributions to lexical theory.
February, 1989 $25.00

The Psychobiology of Down Syndrome

edited by Lynn Nadel

This study covers recent research into the psychobiological concomitants of Down Syndrome, including surprising improvements in cognitive functions such as language. Sponsored by the National Down Sydrome Society.
Available $35.00

Concepts, Kinds, and Cognitive Development

Frank C. Keil

Weaving together issues in cognitive development, philosophy, and cognitive psychology, Frank Keil provides a coherent account of how concepts and word meanings develop in children, adding to our understanding of the representational nature of concepts and word meanings at all ages.
May, 1989 $22.50

Original in Paperback

Connections and Symbols

edited by Steven Pinker and Jacques Mehler

"Anyone who is serious about either embracing or refuting connectionist principles must master the issues detailed in this volume. The issues are presented with clarity and force, and represent a powerful analysis of the current connectionist trend in cognitive science." — David Swinney, Professor of Psychology and Linguistics, City University of New York.

AN IMPORTANT NEW SERIES...

PHONETICS AND PHONOLOGY

Volume 1
Rhythm and Meter
edited by
Paul Kiparsky and Gilbert Youmans

This is a work about the analysis of verse metrics, and more generally, about the sound structure of all spoken language. About half of the contributors are linguists working within, and refining, the tradition of "generative metrics," while the other half are literary scholars representing a variety of contemporary analytical approaches. This collection is intended to initiate and contribute to an ongoing exchange between the disciplines.

$45.00 (tentative)
ISBN: 0-12-409340-X

THEORETICAL MORPHOLOGY

Approaches to Modern Linguistics
edited by
Michael Hammond and Michael Noonan

Theoretical Morphology provides a comprehensive and coherent treatment of contemporary morphological research and theory. A variety of theoretical paradigms are reviewed and illustrated by specific topics of debate within the field. The twenty-one chapters are divided into sections on inflection, function, historical/area studies, mapping to other components, and morphophonology.
